The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Page 2

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification fails to provide proper antecedent basis for (1) the claimed "a plate suction section" in claim 1; (2) the claimed "a linear motion drive mechanism" in claim 1; (3) the claimed "a rotation drive mechanism" in claim 1; (4) the claimed "a linear motion drive mechanism control section" in claim 1; (5) the claimed "a rotation drive mechanism control section" in claim 1; (6) the claimed "a supplying section" in claim 1; and (7) the claimed "a roller section" in claim 11. For example, it is unclear if the claimed "a linear motion drive mechanism" in claim 1 of the instant application refers to the linear motion drive motor (45) by itself, or the linear motion drive motor (45), as well as other elements. Claim 16 of the instant application further confuses the issue as to what is considered to be the claimed "a linear motion drive mechanism". As another example, it is unclear what element(s), e.g., in Fig. 7 of the instant application, comprise the claimed "a rotation drive mechanism control section" in claim 1. Is element (11) considered to be the claimed, "a rotation drive mechanism control section"? Is element 83 considered to be the claimed "a linear motion drive mechanism control section"? Further clarification in the specification is needed to understand what element(s) in the specification comprise each of the above-noted claimed elements.

Art Unit: 3653

Claim Objections

2. Claims 4 and 6 are objected to because of the following informalities: (1) "the rotation mechanism" in line 2 of claim 4 should be -- the rotation drive mechanism --; and (2) "the rotation drive control mechanism control section" in line 7 of claim 6 should be -- the rotation drive mechanism control section --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites, "the **plates** are stored in the cassette such that their image recording layers face downwards" (emphasis added). After this, claim 14 states, "the plate suction section sucks a support layer of **the plate** stored in the cassette". (emphasis added). It is unclear which one of the plates is sucked by the plate suction section. Perhaps this claim could be corrected by changing "the plate" to "one of the plates". Whatever change is made to claim 14 should also be made to claims 15-16, which depend from claim 14.

Allowable Subject Matter

Page 4

4. Claims 1-3, 5 and 7-13 would be allowable if the objections to the specification are address. Claims 4 and 6 would be allowable if the objections to the specification are addressed, and the objections to claims 4 and 6 are addressed. Claims 14-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. With regard to claims 14-16, the objections to the specification also need to be addressed.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A. Morrison whose telephone number is (571) 272-7221. The examiner can normally be reached on M-F, 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Mackey can be reached on (571) 272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
